

**Chronic Disease Prevention and Health Promotion Section
Advisory Council on the State Program for Wellness and the Prevention of Chronic Disease
Preventive Health and Health Services Block Grant Update (PHHS)**

August 13, 2020

Grant Information:

- A public hearing was held on June 3 to receive public comment regarding funding recommendations and the work plan activities to submit with the PHHS Block Grant application
- Nevada applied for continuing block grant funding for the 2020-2021 Grant Year on July 1.
- The CDC Project Officer reviewed and approved Nevada's PHHS Work Plan on July 15.
- The CDPHP Section is in process of drafting subawards for six organizations including the State's three local health authorities.

Evaluation and Reporting:

- Quarter 3 reports were due July 15 and have been evaluated. COVID has been reported as a barrier by most partners as it has impacted activities designed to promote increased physical activity and other health interventions. COVID has also slowed efforts to address public health infrastructure and accreditation due to strains on staff resources. However, CHW trainings have not been as greatly impacted as it was a hybrid course that has temporarily become online-only learning.
